

Block Modelling Service

Block Models that look, feel and work like the real thing!

From basic machined CNC to fully functional working models

Our experience and expertise in this field is second to none...

ARRK has been producing block models and fabricated models for clients around the world for over 60 years. It's one of the founding services that we offered to clients when we first started in business all those years ago.

Our model makers are able to use the latest innovations in materials, machining and assembly techniques along with time served craftsmanship to produce models that look, feel, weigh and, where possible, even operate like the real thing.

Our experience and expertise in this field is second to none and combined with our global capacity it means we are able to meet the most demanding of projects and timescales.

Offering you a competitive, personalized service that understands your needs and the way you operate.

ARRK's skilled model makers are able to produce eye catching models of varying sizes and degrees of complexity, covering a range of industry sectors.

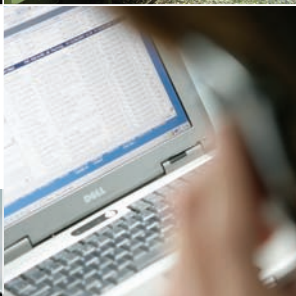

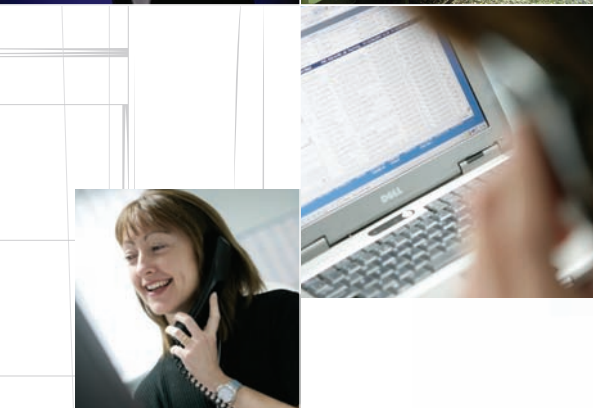

ARRK's global activity and capability allow us to provide clients with a wide range of solutions to suit their project needs. We are able to bring the latest solutions used around the world to help our clients here in the US. Our team of dedicated project advisers and coordinators works closely with you to understand your project requirements and to then source a range of solutions for you using our facilities here in the US, or using ARRK facilities around the world.

We are able to offer clients a range of block model solutions to suit their specific needs. Ranging from a straightforward component machined from CNC we can also produce models that simulate the client's material, paint, finish and simple operational requirements – making them look just like the real thing! This is great for clients looking to evaluate their designs, or for pre launch publicity and marketing.

Our team of project advisers and coordinators is your gateway to a hassle free service and one that can offer you a range of solutions.

We have been helping clients to develop their ideas from a wide range of industries from telecommunications, automotive and electronics to name but a few. Once clients see our models they are always delighted with the result!

“We're here to support you”

Block Model Options

Grade 4 (Simple but quality CNC Block Model)

- Precision CNC machined block model
- Engineering plastics and metal options

Grade 3

- Block model with simple paint and finishing
- No Graphics

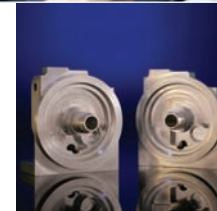

Grade 2

- Realistic weight
- Finished and painted according to client requirements
- Graphics applied
- Materials matched to client specifications

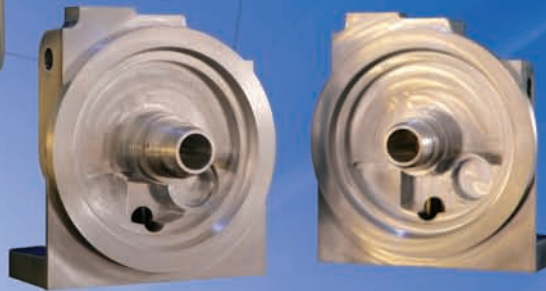

Grade 1

- Realistic weight
- Graphics applied
- Working features
- Materials matched to client specifications
- Finished and painted according to latest customer requirements
- Operating Effects/Functionality
- Optional illumination effect depending on component design

The above mobile phone images are shown only as an example of the different block model grade options ARRK can offer.
