## PremCast

A new premium, high quality vacuum casting service from ARRK

It's like nothing else you've seen

Taking vacuum casting quality to new heights

# Our premium vacuum casting is designed to meet your highest expectations!

**ARRK is delighted to unveil its new “PremCast” service. “PremCast” is ideal for clients seeking exceptional quality in prototype and low volume vacuum castings.**

With over 60 years experience in prototyping and assisting clients to develop their products, we’ve launched this new service to meet the growing demand in this niche area of the market.

## Premium Castings... Premium Service

ARRK’s newly launched premium vacuum casting service is designed to meet the most demanding of client needs. By working closely with our clients to understand their precise requirements, we are able to call upon a number of ARRK’s global facilities to provide you with the highest quality castings, tailored specifically to your industry.

We use ARRK facilities with a range of vac casting expertise and know how

Each of ARRK’s facilities specializes in a particular area of expertise within the product development arena. When it comes to the production of premium vacuum castings we can call upon a number of ARRK facilities to provide our clients with a range of products, from high quality automotive lenses to medical instrumentation, hand held devices or even large, flat screen televisions.

It’s new; it’s innovative; it’s of the highest quality:

3

# How does ARRK's premium vac casting service differ from conventional methods?

Using only precision CNC machined master components, we are able to ensure the highest accuracy levels before we create our silicone molds. This way we can ensure that subsequent castings are all of the highest standard.

## Taking color matching and finishing to new heights

As you would expect with ARRK, our depth of down stream services is extensive. What's more, when you order our premium vac castings, our team of dedicated specialists will use their in-house color matching and surface finishing expertise to offer you the very best castings.

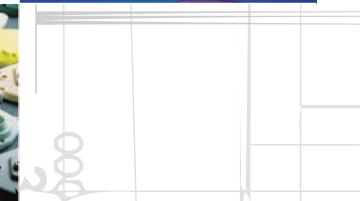

These can be produced using resins that simulate specific material characteristics, pantones or RAL requirements. Please ask for more details on some of the exceptional surfaces we can achieve – you'll be blown away! You may even see a finish that you never considered before.

It's available to you from ARRK now!

Our finishing team take our prototype castings to another level.

Local project management team using ARRK's global capabilities to provide our clients with very specific, high quality needs

ARRK's team of project coordinators are constantly kept up to date with developments across all ARRK sites. Our vac casting operation in the US is one of the very best in the industry, but combined with our additional ARRK vac casting facilities globally we really are able to offer you an unrivalled service.
